

## **THE COASTAL HOSPITAL AT HAGEVIK**

*A specialist hospital for elective (planned) orthopaedic surgery*

We annually perform

- 1800 to 2000 operations on all areas of the musculoskeletal system;
- 11000 clinical assessments are carried out by specialist doctors;
- 14000 x-ray examinations.

We offer patients a comprehensive range of health services from clinical examination to treatment, care, mobilisation and further follow-up.

We are a research and teaching unit under the University of Bergen. The hospital is responsible for the education of medical doctors,

## Welcome to the Coastal Hospital at Hagevik

On the following page, information can be found about how to get to us. The main entrance is at the side of the hospital that faces the sea. You register your arrival at the reception desk in the patient reception area. The whole assessment process usually takes 30 to 60 minutes.

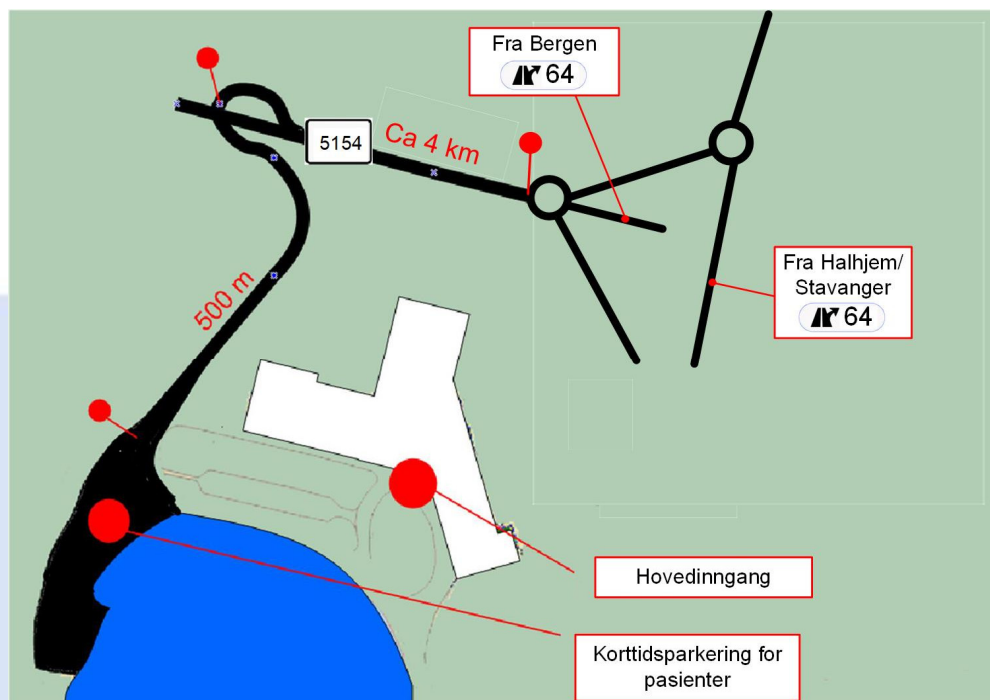

Further examination and tests may be required before a decision is made regarding the type of treatment you require. Treatment may involve an operation or medication, exercise, physiotherapy, or a combination.

If surgery is planned, you must usually attend a pre-operative assessment day. In some cases, the required assessment can be completed at your first appointment.

If so, you will receive information from different members of our multidisciplinary team, and your appointment may take a little longer than originally stated in your appointment letter.

### By bus ([www.skyss.no](http://www.skyss.no))

### Other means of transport/questions

Contact *Pasientreiser* (the patient travel office) at tel. (+47) 05 515 or at [helse-bergen/pasientreiser](http://helse-bergen/pasientreiser)

**The hospital treats most musculoskeletal conditions apart from acute injuries. The biggest patient groups are:**

- hip, knee and shoulder conditions that are treated by replacing joints with a prosthetic implant or replacing prosthetic implants;
- back conditions, such as prolapses and spinal stenosis, in addition to other back conditions that can be treated by implants;
- shoulder, knee, ankle, elbow, hip, foot and hand conditions that can either be treated by keyhole surgery or open surgery.

**Internet access.** There is free Wi-Fi at the hospital.

**Canteen.** Is located on the ground floor and is open on weekdays from 10.00 to 15.00.

**ATM.** There is no ATM at the hospital, but you can pay for goods and the patient charge using a bank card .

**Address:** Hagaviksbakken 25, NO-5217 Hagavik

**Telephone:** (+47) 56 56 58 00
